

CBmed is a globally strong growing research company for biomarker research in medicine with its headquarter in Graz. CBmed links excellent research infrastructure, scientific expertise, medical knowledge, national and international industry partners for systematic medical biomarker research. Business language is English.

In line with the overarching vision of "Enabling applied precision medicine", CBmed will establish itself as a leading centre in cancer research.

To strengthen our team in Graz, we are seeking to recruit an ambitious, committed

Head of Cancer Research for Precision Medicine (f/m/d)

Tasks:

- Actively shaping the research strategy, connecting with the leaders of our Core Technologies and microbiome research and report directly to CBmed Management
- Proactive engagement with our national and international clinical partners to understand and develop appropriate solutions or the clinical workflows in precision oncology
- Continuous scientific area management: supervision and coordination of groups and project entities, conflict resolution, transparency, and information transfer
- Planning, continuous review and realization of long-term area-strategy in line with the company strategy for K- and non-k Projects (scientific focus with development of products and services for patient care and cure)
- Entrepreneurship for the assigned area by steering the dedicated projects towards contractual scientific targets as well as financial budgets
- Preparation of counter measures together with project leads and proposals for decision by the CEOs in case of relevant deviations from the project plan
- Initiation and coordination of dissemination activities in accordance with CEOs
- Support of the HQ in the resource management of area (personal resources, strategic investments, budget planning)
- Regular reporting of the area progress and success stories (including internet publications)
- Point of scientific contact for all staff employed within projects of the research area
- Facilitation, support, and mediation of communication processes between executive level (CEOs, Science Board) and project employees.
- Autonomous planning and execution of all the above-mentioned core tasks in consultation with the CEOs

Skills and Abilities:

- PhD or MD in medical or basic natural sciences
- A deep understanding of tumor cell biology and drug/tumor cell interaction is necessary to support our ambitious projects
- Robust scientific track record, including publication of original research articles in high impact journals, evidence of third-party funding and establishment and management of research teams
- Openness to work in an international team
- Willingness for international travel to our scientific partners and international customers
- Experience in leading teams
- Experience in executing formally structured projects and respective financial aspects
- Fluid communication in German and English
- Pronounced sense of empathy
- Strong sense of responsibility

You will have the opportunity to work in an international connected company, within a young, dynamic, and international team.

We offer an unlimited contract with an annual gross salary € 100 000 based on 40 hours/week. An partial employment at the Division of Oncology of the Medical University of Graz with clinical research is an option for this position.

CBmed offers relocations costs support in case of international applicants.

Start date **01.05.2022 or earlier.**
